

Retraction of article

Gîju S, Flangea C, Ursoniu S, Crăciun I, Dumitrascu V, Vlad D, Ostafe V and Chiriac A
Correlation of Serum Creatine Kinase, Creatine KinaseMB, and Troponin I with Cardiac Pathology in EndStage Renal Disease Patients, RRML, 2008, 12(3): 55-61.

The Editor-in-Chief has been informed that the above mentioned article has very closed similarities with the article: *Daylily S. Ooi, Phillip A. Isotalo and John P. Veinot* Correlation of Antemortem Serum Creatine Kinase, Creatine Kinase-MB, Troponin I, and Troponin T with Cardiac Pathology, Clinical Chemistry, 2000, 46:3, 338–344.

After checking both articles, it was obvious for the Editors that extended parts of the second mentioned article were used without referencing and mentioning this publication in the manuscript submitted to our journal.

According to the Guidelines of the Committee on Publication Ethics (COPE) and the World Association of Medical Editors (WAME), this amounts to substantial plagiarism which requires retraction.

The decision was taken to retract the article from the Romanian Review of Laboratory Medicine.

The authors have been informed about this decision.

Minodora Dobreanu, MD PhD
Editor-in-Chief RRML.
